EXPERIENCE

Product Designer (UI/UX) – Owting Remote | Sept 2025 – Present

- Lead end-to-end design of core product features for a community-driven platform, translating ideas into intuitive user flows and polished interfaces.
- Own and maintain the Figma design system, ensuring visual consistency and scalability across all product surfaces.
- Collaborate closely with engineers and product leads to bring designs into production with precision and creativity.
- Conduct rapid iterations and prototype testing to validate new concepts and enhance user engagement.
- Contribute beyond visual design by shaping product direction, defining workflows, and refining the brand's digital presence.
- Support startup growth by jumping into fast-turn tasks, from UI experiments to visual assets for marketing and community engagement.

Product Designer – Taffy (AI Recruiting Tool) Boston, MA | Jan 2025 - Present

- Designed and shipped marketing visuals, campaign graphics, and product interfaces for an AI-driven recruiting platform.
- Developed brand-aligned UI components, illustrations, and infographics using Adobe Creative Cloud and Figma.
- Collaborated with founders and engineers to produce visuals for web, social, and feature launches.
- Created internal templates and promotional decks in PowerPoint and Canva to support sales and recruiting outreach.
- Strengthened brand consistency across marketing and product channels by building modular design systems.

Marketing and UX Design Intern Cervera Real Estate Remote | Jun 2024 - Aug 2024

- Created marketing and social media graphics, print materials, and interactive landing pages for real estate campaigns.
- Produced icons, motion graphics, and digital ads using Photoshop, Illustrator, and After Effects.
- Delivered high-impact visuals aligned with brand guidelines under tight deadlines, supporting multiple simultaneous campaigns.

PROJECTS

Boston University – AI Task Force Dashboard Boston, MA | Sept 2024 - May 2025

- Led the visual design of a multi-platform analytics dashboard supporting university research on AI policy.
- Produced infographics, reports, and marketing collateral used in public communications and academic presentations.
- Used InDesign, Photoshop, and Figma to deliver data-driven visuals that increased researcher task efficiency by 35%.
- Partnered with marketing and research departments to maintain consistent branding across all materials.
- Facilitated design workshops to align creative direction and ensure clarity across deliverables.
